

1941 Wheat Crop in Alberta Estimated 94,000,000 Bush.

As last year's 1941 wheat crop has been estimated at 94,000,000 bushels, according to a preliminary figure released last week by Hon. D. Bruce MacMillan, minister of agriculture. This is about one-half of the 1939 wheat yield, which totalled 187,000,000 bushels.

Mr. MacMillan's statement was made in the 10th fortnightly crop report of the provincial government.

The estimated yield also is given by Mr. MacMillan, in 75,000 bushels, as against 114,000,000 bushels last year; and 114,000,000 bushels in 1940, compared to 34,500,000 bushels last year.

YIELD PER ACRE

It was pointed out that a substantial reduction in acreage sown to wheat took place this year, totalling 2,014,000 acres. At the same time it is noted that the present estimated average yield per acre is 14.1 bushels, which is 7.5 bushels more than last year's 6.6 and 3.9 bushels less than the long time provincial average.

The report points out that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

report states that harvesting has been delayed throughout the province by wet weather. In the southern portion of the area west of Calgary and north to Camrose and in the northern part as well, there has been a lowering of rainfall due to recent in the south and blanching.

It is noted that weather conditions, further estimates may be expected, the report declares.

Outing in practically completed, although some districts report 75 per cent of the acreage grain still standing. In the Drumheller and Youngstown areas, combine operations on the wheat crop are about one half finished.

YIELDS DISAPPOINTING

In the south and east of the province, threshing is nearly completed, but it varies from 10 to 20 bushels an acre in the Peace River area, to from 20 to 50 per cent completed elsewhere.

It is noted that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

It is reported that oats and barley have shown increases and that the province's present yields are equal to wheat from the eastern part of the province, north of Medicine Hat, where from 10 to 15 bushels an acre is the order of the day.

Wedding Bells

Craigville Wedding of Popular Local Couple

DUNYRKE-NEILSON

At 2 o'clock on Sunday, September 14, a very pretty wedding was celebrated at the home of Mr. and Mrs. Edward Neilson, of Craigville, when their only daughter, Bertha Neilson, became the bride of John William Dunyrke, of Delia.

The bride was attended by Mrs. Wm. Dunyrke, of Delia.

Rev. Thos. Taylor officiated at the ceremony, which was performed in the front parlour of the Neilson home. The ceremony was attended by a large number of guests, including many of the local people.

ONTARIO "EAR-MARKS" FUNDS FOR HIGHWAYS

The new year the Ontario government has "ear-marked" all motor-vehicle taxes for highway purposes. It is pointed out by officials of the Ontario Department of Highways that the province has spent millions of dollars on building better highways, the only way to speed up the movement of traffic and to save the province of Ontario from the financial drain of the federal government.

JUNIOR CALF CLUB SHOW

A meeting of the executive of the Delia Agricultural Improvement Association was held in the first room on Saturday last. Owing to the absence of the secretary, G. W. Gibson, it was necessary to make a temporary appointment. Mr. Gibson was named to act.

Chief business before the meeting was the arrangement of details concerning the Junior Calf Club Show, which is to be held on Saturday, October 12, at the Delia Agricultural Grounds.

This will be the first show of its kind in Delia, and as there are over twenty members in the club and cash prizes are to be awarded every exhibitor, there is likely to be a good turnout and in promising view of breeding stock.

In addition, and in view of the demand for increased egg production, it has been decided to sponsor a poultry contest. Exhibitors from other towns or country in two classes, light and heavy breeds, each exhibit to consist of a single hen and a single egg. The business men of Delia have promised for the prizes in this competition, of which there will be sixteen; four for each breed of pullets, and four for each breed of cockerels.

An interesting feature of the poultry side will be a demonstration of brooding poultry.

Entries for both calf and poultry exhibits may be made on the grounds at any time before September 30, 1941. The day of the show.

The Fall Seeding of Grasses

In seeding grass, the choice of a suitable seed time is an important factor if a satisfactory stand is to be secured. Grass seed will germinate best, and seedling survival will be highest if seeding is done in a relatively cool period of the year. This is especially true in the warm sections of the province where moisture is limited, and in the case of such a crop as crested wheat grass which makes its best growth in cool weather.

Satisfactory stands of grasses may be secured by seeding in the fall, in deciding the definite date for seeding, however, regard must be had for the condition of the soil, and so the province's climate.

Where it is desired to sow on summer-fallow with sufficient culture close to the surface to germinate the seed at seedling should be done between August 15th and September 15th. With the land well drained and moisture conditions adequate, grass before freezing is sufficient to give reasonable assurance of survival over winter.

Local fall seeding may be drilled in on the stubble without special attention to the preparation of a seed bed. The presence of stubble-traps or weeds is permitted to a large surface which will permit erosion. Seeding should be shallow.

LAST CALL

To Pay Your 1941—Income Tax

on the Government Monthly Plan
You Must Start at once!

Next Tuesday will be the last opportunity to pay your 1941 Income Tax on the Government Monthly Plan. This gives you the privilege of paying in twelve monthly installments without interest, instead of by lump sum in March, 1942.

Here is how to get the monthly payment privilege! What you pay each month is \$1.00. This is your payment—and must be paid to the Government on or before September 30, 1941. You will then pay the same amount before the end of each month for the balance of 1941. When you have paid 12 months of \$1.00 each, at the 1941 rate you will deduct the four payments you will have already made, and pay the remainder in eight equal monthly installments, starting January, 1942.

The Government offers the above plan as the most convenient method of paying your income tax obligations. Ask your local Income Tax Office for Installment Income Tax Remittance Form—and any further information you may require.

Commissioner of Income Tax

Say you saw the Advt. in "The Delia Times."

"Imagine it taking a war to set us right!"

Thursday: "There's one thing we can thank Hitler for. He's got us saving at last."

Wife: "Yes! Imagine! It's become a positive custom to get us saving money to get just what we need."

Thursday: "I think it's partly because the War Savings Certificates are so simple to buy."

Wife: "You mean the idea of getting the office to deduct a regular amount each week from your salary?"

Husband: "Yes! And how they're mounting up! Quite a nest-egg when you count the interest they're earning."

Wife: "Well the more the merrier, I say! There are lots of things we'll need the money for, as the years roll by."

Youth Training

During the past four years thousands of young men and women have been given the opportunity to take special courses in agriculture and other fields. This is a part of the Youth Training program, which is designed to give young men and women the opportunity to learn a trade or profession while they are still in school. The program is administered by the Department of Education, and is open to all students who are interested in agriculture or other fields.

Applications for courses in agriculture should be sent to the Director of Education, Department of Education, Edmonton. The Director of Education will be glad to provide you with more information about the program.

Two More Eggs Per Bird Per Month

Lathrop Experimental Station
Wesley Lathrop

British Columbia eggs, 10% more than those of Canada, and only a general improvement in management and feeding can produce them. In this, two more eggs per bird per month from all laying birds in Canada will do the trick. A few simple suggestions, that can be easily applied by all producers, will make it possible.

Cleanliness in the poultry house is one of the first essentials. This means that a poultry house should be thoroughly cleaned by removing all bedding and droppings, scrubbing the walls and floor and then spraying or painting the walls with white wash. This should be done at least once a week.

Food should be given in small quantities, and should be given at regular intervals. The food should be given in small quantities, and should be given at regular intervals. The food should be given in small quantities, and should be given at regular intervals.
